

Professional 7 inch digital multi-media photo frame

AKITA III

AKITA provides the multi media experience inside a slim line picture frame. Just pop in a memory card and it will automatically play all your pictures in a slide show format.

AKITA not only supports JPEG format, it can also play your movies in MP4 format. This includes XVID and many others.

AKITA can also play your music in the mp3 format.

AKITA is suitable for your home or office and can be displayed either horizontally or vertically.
